

# What's new in Tizen .NET?

New Update for Galaxy Watch and Samsung TV

**Hobum (Vincent) Kwon**

Principal Engineer, Samsung Electronics

**Brandon Minnick**

Developer Advocate, Microsoft

From the title, you may ask ...

- What is Tizen?
- What is Tizen .NET?

Including answers for the questions, let's set the agenda first.

## Agenda for this session:

- Introduction to Tizen Platform and Tizen .NET
- Overview of Xamarin
- 10 new updates in Tizen .NET with demo

## Questions:

- How many of you use Tizen SDK for making applications?
- How many of you use Xamarin & .NET for making applications?

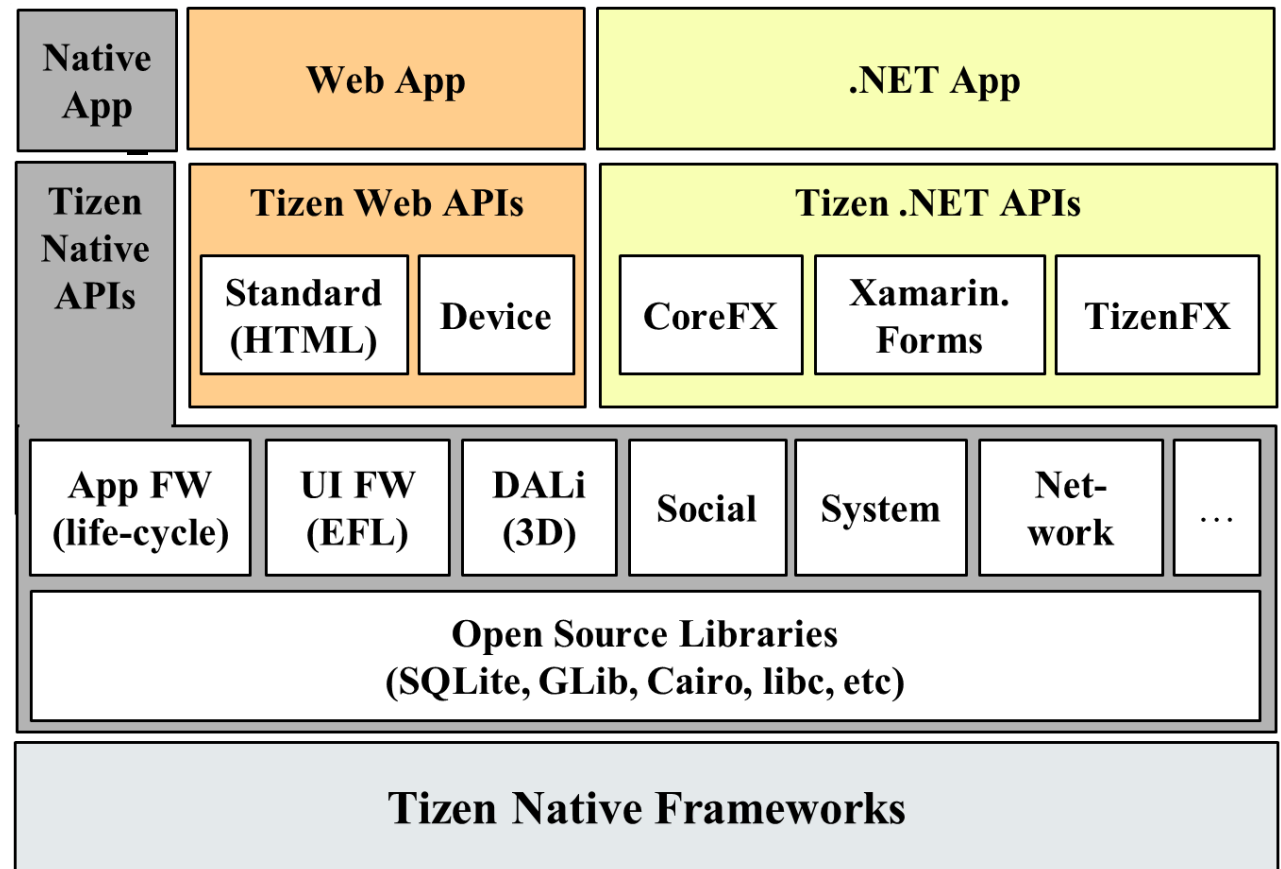

# Tizen

- Linux-based open source platform since 2012
- Designed & optimized for CE devices
- **100 million** Tizen-based devices already
- Adopted to
  - Samsung TVs (since 2015)
  - Galaxy Watches (since 2014)
  - Family-Hub (since 2016)
  - Phones (Z1, Z3, Z4)
  - ...
- Current: Tizen 5.0 M2 (Nov 2018)

### 3 Tizen Application Models

- Web app model  
HTML5, CSS, JavaScript
- Native app model
  - C/C++, open source libs
- Tizen .NET app model
  - C#, .NET, Xamarin

# Tizen .NET

- Introduced to improve application development experience
- Included all Tizen 4.0 devices
- 2018 Samsung Smart TVs and 2018 Galaxy Watch Products

+

# Reasons of high productivity in Tizen .NET

Powerful as Java  
Object-oriented, strong typed  
New advanced features added

Open source on Linux, Mac, Windows  
+32,000 APIs (.NET standard 2.0)  
Strong community (estimated 8 million)

High productivity (Intellisense)  
Tons of extensions & tools  
NuGet package managers

## TizenFX

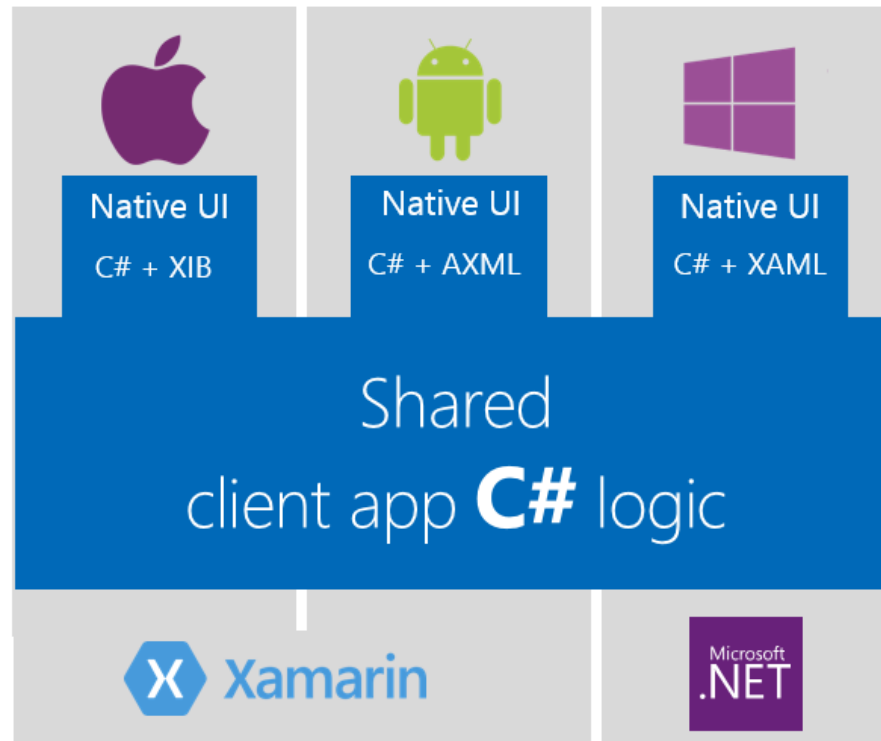

(Tizen-specific features)

## Samsung-specific UI Controls

# Tizen .NET + Xamarin

- Make native UI development much easier than Tizen Native
- Provides cross-platform APIs with tons of developer references

Tizen .NET

+

# Xamarin.Forms

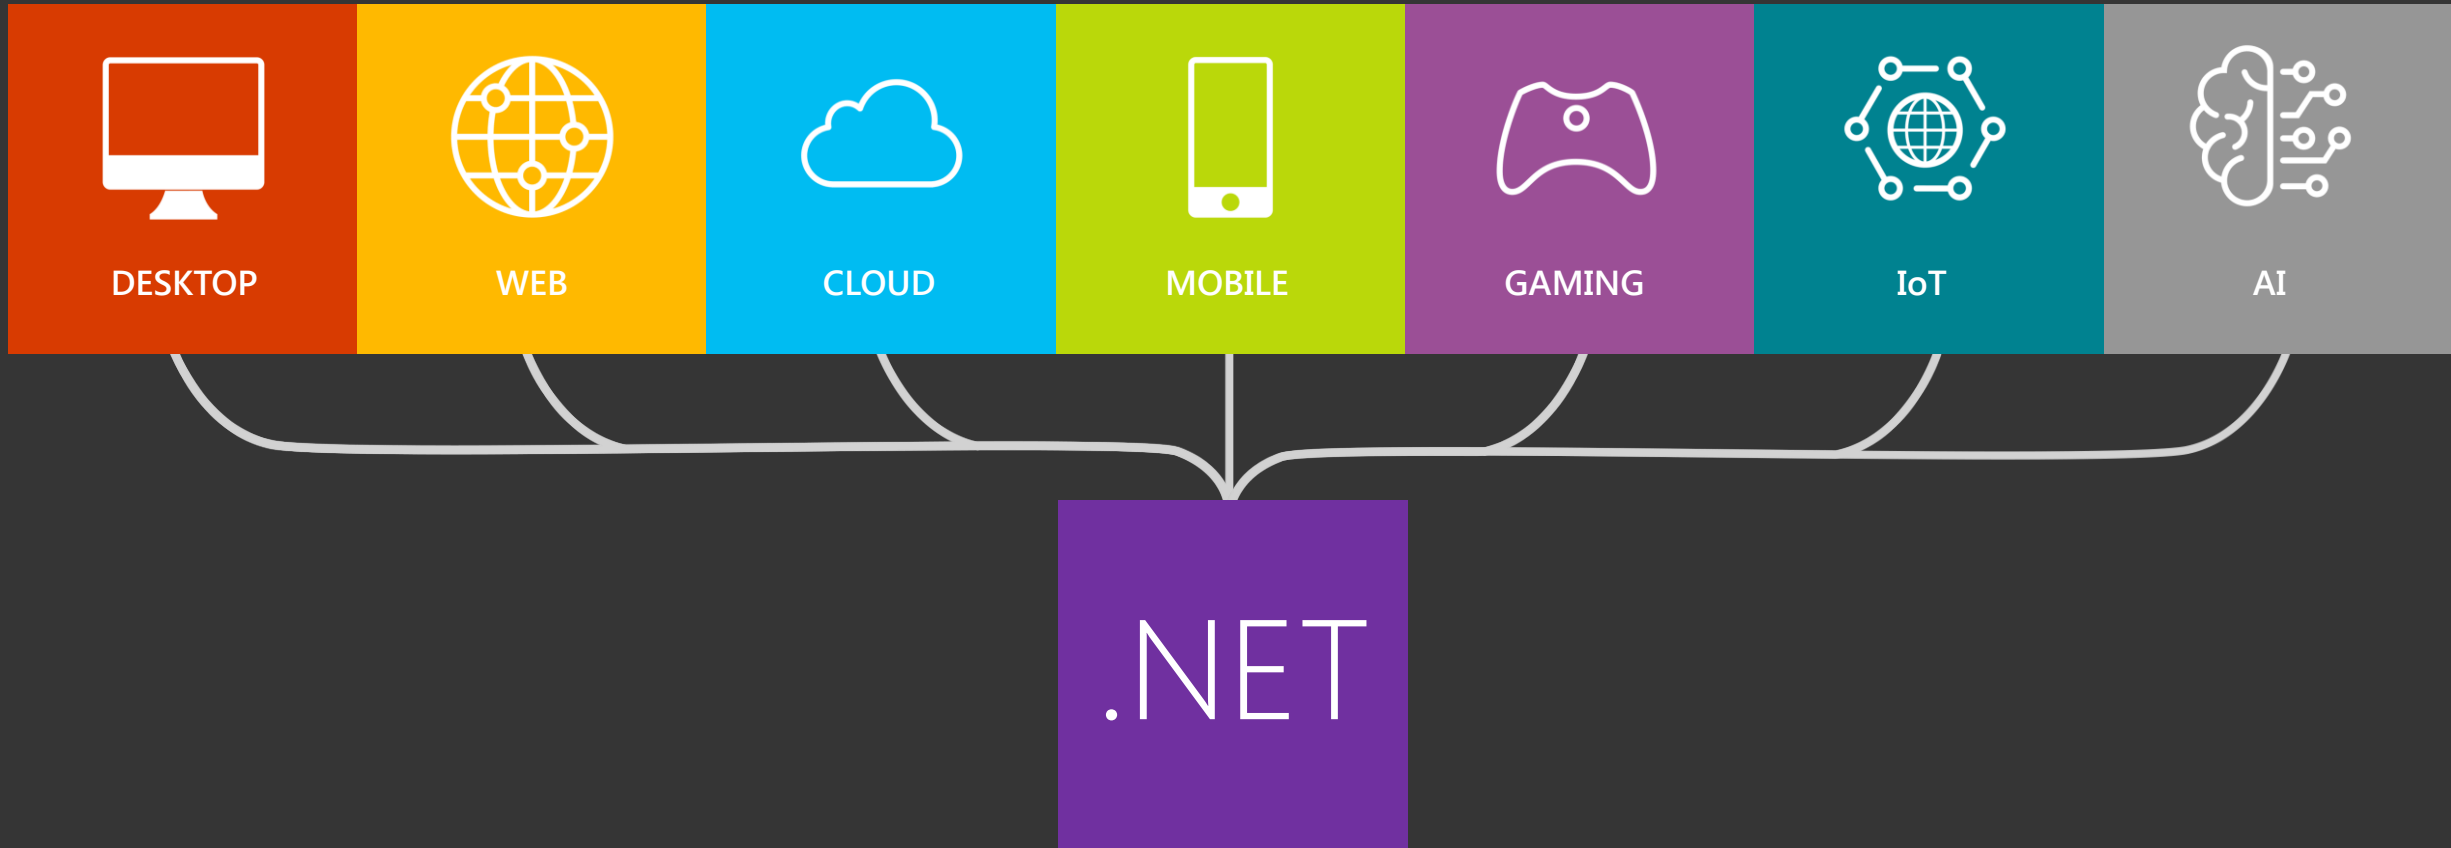

Brandon Minnick  
Developer Advocate

# What is .NET?

# Your platform for building anything

# C# Runs on .NET

Along with F# and Visual Basic

What is  
Xamarin?

# Original Approach

No shared code • Many languages and development environments • Multiple teams

# Xamarin's Approach

iOS C# UI

Android C# UI

**Shared C# logic**

Shared C# codebase • 100% native API access • High performance

# Xamarin + Xamarin.Forms

More code-sharing, all native

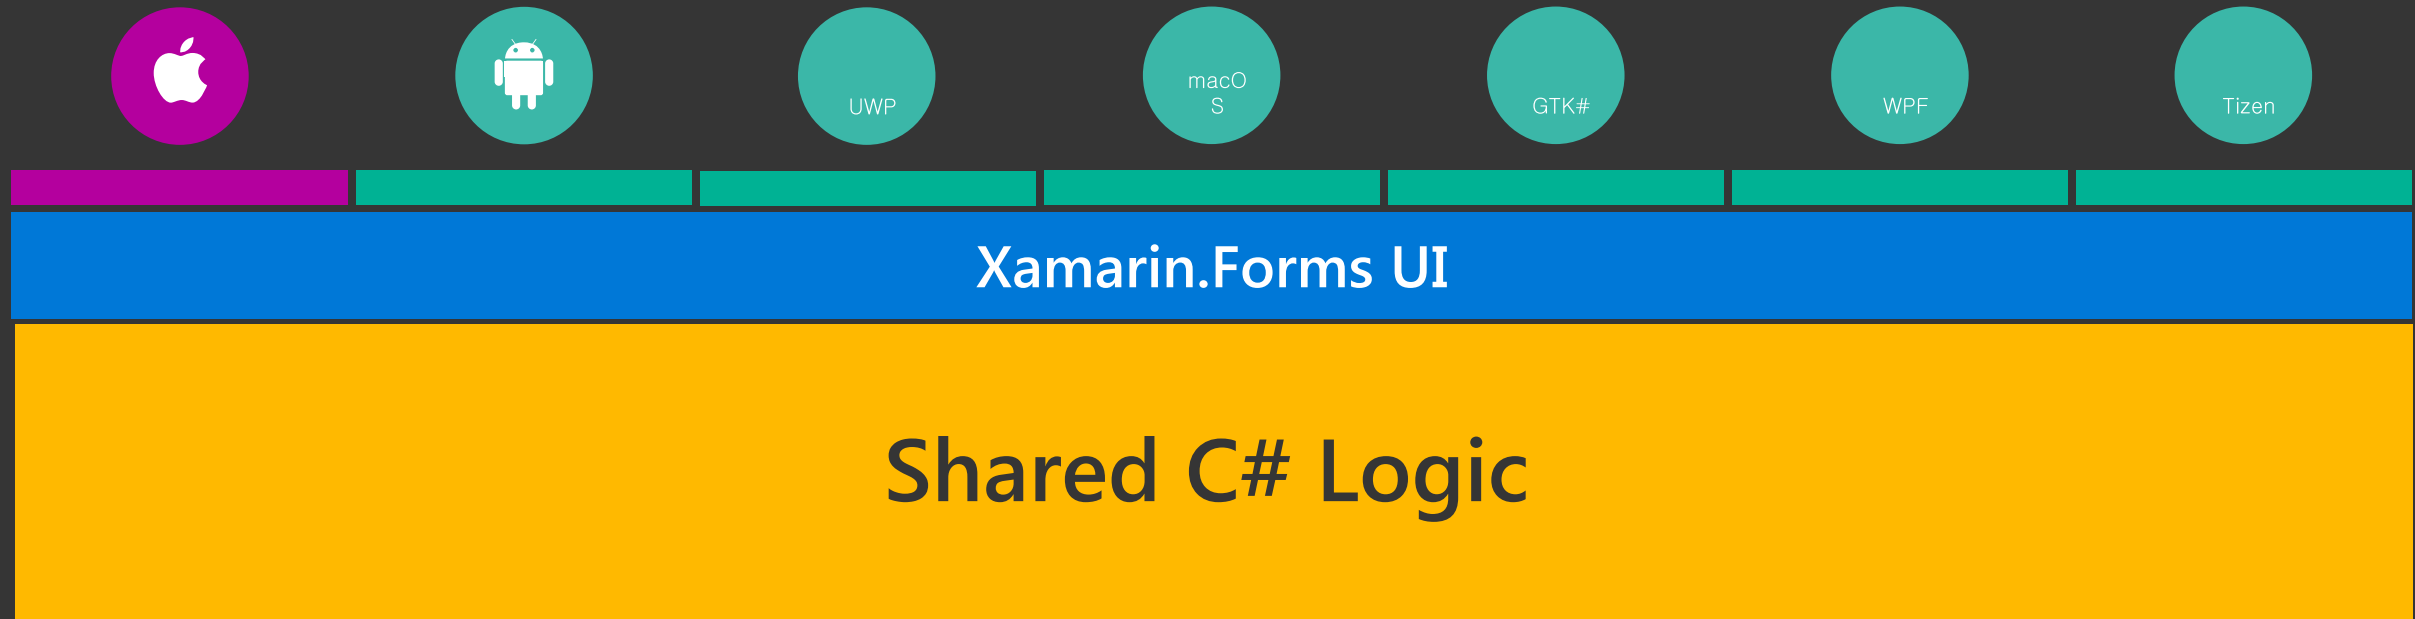

Traditional Xamarin Approach

Xamarin.Forms Approach

# Xamarin + Xamarin.Forms

More code-sharing, all native

Xamarin.Forms Approach

# Demo

Xamarin.Forms

# 10 New Updates in Tizen .NET

Hobum (Vincent) Kwon

# 1. Stores are ready for Tizen .NET apps

- Register your apps to Galaxy Apps (for watch) and Samsung Apps (for TV)
- Devices which can run Tizen .NET apps are
  - 2018 Samsung Smart TVs
  - Galaxy Watch

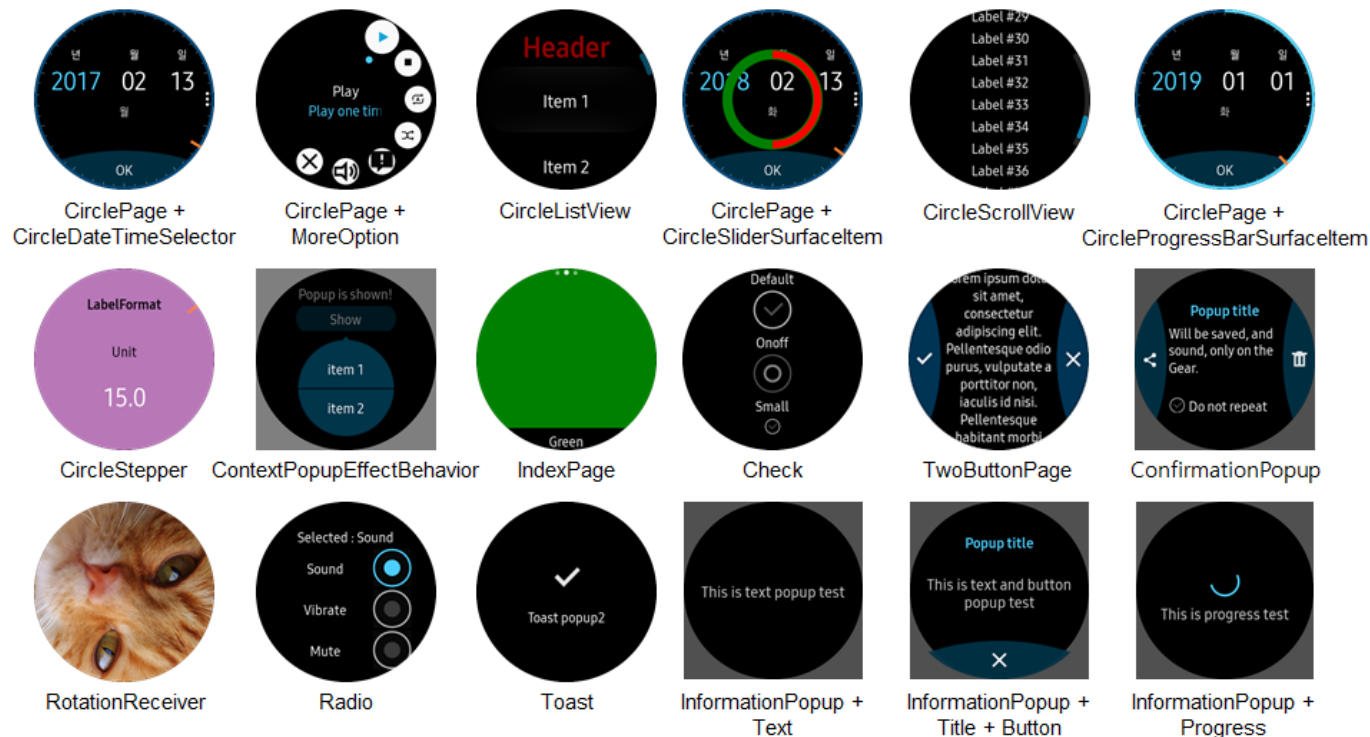

<https://www.samsung.com/global/galaxy/apps/galaxy-apps/>

<https://seller.samsungapps.com/tv/portal/main#>

## 2. Tizen Circular UI for Galaxy Watch

- Enable easy watch app development with Tizen Circular UI APIs

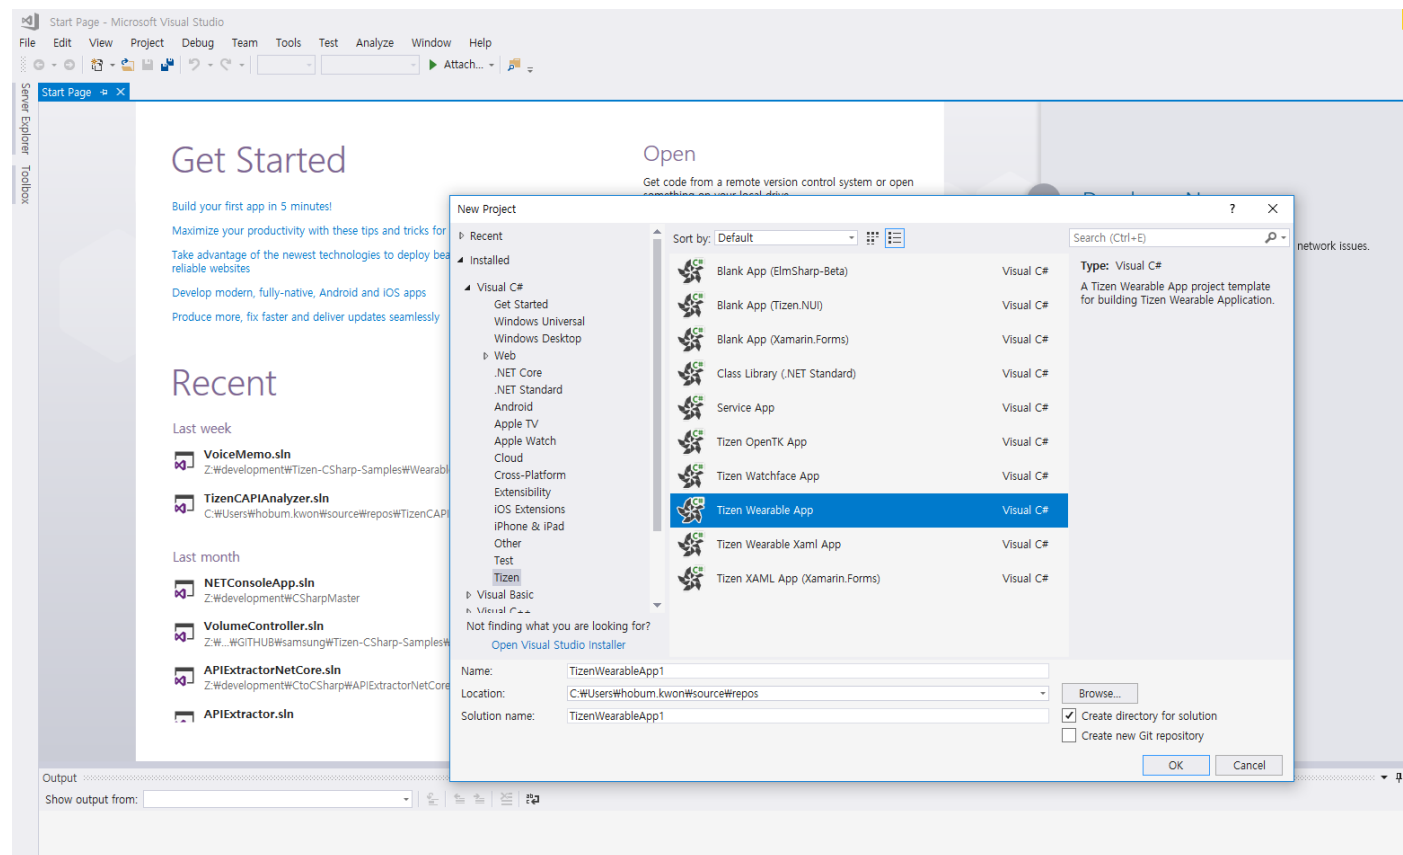

Source code: <https://github.com/Samsung/Tizen.CircularUI>

Nuget: <https://www.nuget.org/packages/Tizen.Wearable.CircularUI/>

## 2. Tizen Circular UI for Galaxy Watch

- Just create a “Tizen Wearable App” from a project template

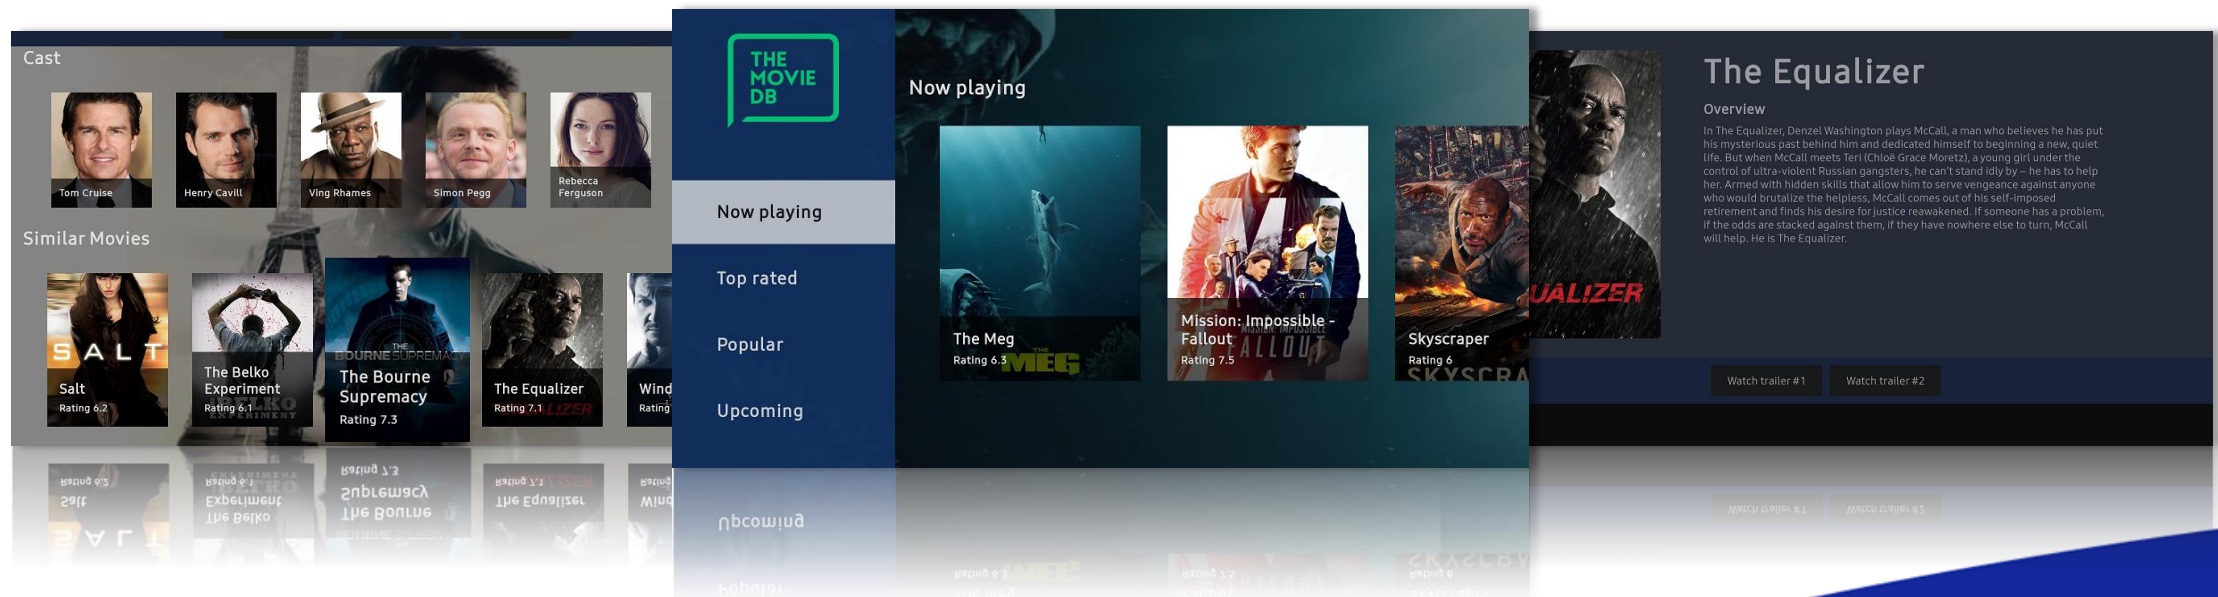

### 3. Tizen TV UI for Samsung Smart TV

- Enable easy smart tv app development with Tizen TV UI APIs.

Source code: <https://github.com/Samsung/Tizen.TV.UIControls>

Nuget : <https://www.nuget.org/packages/Tizen.TV.UIControls/1.0.0-beta-00003>

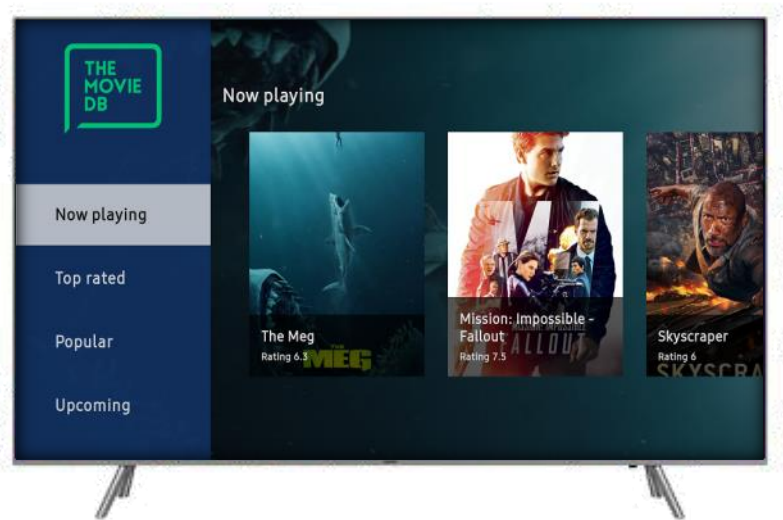

Browse **Tizen.TV.UIControls** from Nuget Package Manger in Visual Studio

### 3. Tizen TV UI for Samsung Smart TV

- Newly released Tizen TV UI APIs (UI Controls) as below:

Media Player

Drawer + ListView

Focus Chain

RecycleItemsView

Media Player + Embedding Controls

Focus Management

ImageCell with Text

Entry and Editor

Popup

## 4. .NET Core Runtime for Tizen

### INTRO & ROADMAP

- Microsoft Maintained Open-source CLR & .NET Class Libraries  
\*Common Language Runtime
- High Performance & Modular Design
- Supporting Linux, Mac, & Windows
- Compatible w/ .NET FW, Xamarin and Mono via .NET Standard
- Now .NET Core 2.1.5 & Upcoming Ship Dates Are:

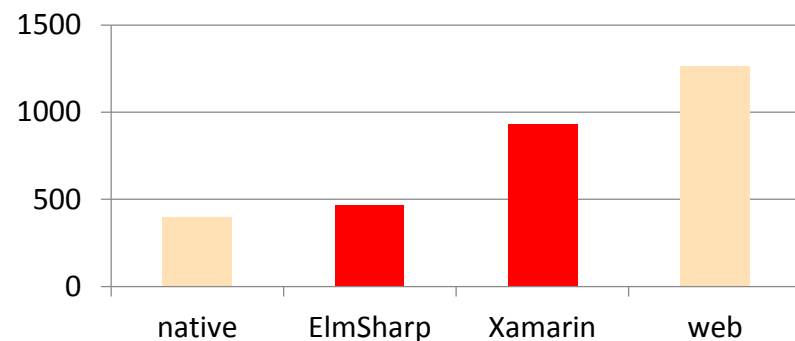

Milestone	Release Date
.NET Core 2.2	Q4 2018
.NET Core 3.0	Q1 2019

## 4. .NET Core Runtime for Tizen

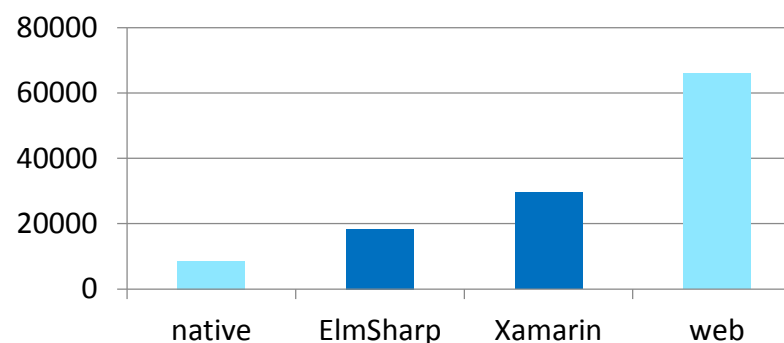

### PERFORMANCE & VERSION MAPPING

- Performance (Galaxy Gear – Tizen 5.0)

(msec) **Application Startup Time**

(KBytes) **Memory Usage**

Tested with  
Simple Stopwatch App

- Version Mapping

- Tizen 4.0 : .NET Core 2.0.0
- Tizen 5.0 : .NET Core 2.1.4

## 4. .NET Core Runtime for Tizen

- .NET Standard 2.0 has the set of 32,000 APIs
- CI for Functional Regression & Performance Statistics
- Test All APIs under Secure Application Environment

	Total	Pass	Pass Ratio
<b>CoreCLR Tests</b> Core managed library, Loader, GC, JIT, Hosting, ReadyToRun, Base services, Exceptions	10,998	10,998	100 %
<b>CoreFX Tests</b> System.IO, System.Collections, System.Xml, System.Globalization, System.Net, System.Linq, System.Text, System.Threading, and more ...	492,943	492,943	100 %

## 5. Tizen specific TizenFX API (version 5)

<b>Tizen</b> - common	<b>Account</b> .AccountManager .FidoClient .OAuth2 .SyncManager	<b>NUI +</b> .BaseComponents .Constants .UIComponents	<b>Pims</b> .Calendar ..CalendarViews .Contacts ..ContactsViews	<b>Telephony</b>
<b>Applications+</b> .AttachPanel .CoreBackend .DataControl .Exceptions .Messages .NotificationEvent Listener .Notifications .Shortcut . RPCPort	<b>Maps</b>	<b>Network</b> .Bluetooth .Connection .IoTConnectivity .Nfc .Nsd .Smartcard .WiFi + .WiFiDirect	<b>Security</b> .SecureRepository ..Crypto .TEEC	<b>Nlp</b>
<b>Content</b> .Download .MediaContent .MimeType .AppHistory	<b>Messaging</b> .Email .Messages .Push		<b>Sensor</b>	<b>Uix</b> .InputMethod .InputMethodManager+ .Stt .SttEngine .Tts .TtsEngine .VoiceControl
<b>Location</b> .Geofence	<b>Multimedia +</b> .MediaCodec .Remoting .Util .Vision	<b>PhonenumberUtils</b>	<b>System +</b> .Usb	<b>ElmSharp +</b> .Accessible .Wearable
			<b>WebView</b>	

## 6. Tizen Support for .NET & Xamarin 3<sup>rd</sup> APIs

- [SkiaSharp](#)
- [FFImageLoading](#)
- [MicroChart](#)
- [Xamanimation](#)
- [CarouselView](#)
- [XamarinMediaMenager](#)
- [XamarinMediaMenager](#)
- [Xam.Plugins.Messaging](#)
- [SimpleAudioPlayer](#)
- [UserDialogs](#)
- [SharePlugin](#)
- [SettingPlugin](#)
- [SecureStorage](#)
- [Permissions](#)
- [Media Plugin](#)
- [DeviceInfoPlugin](#)
- [ConnectivityPlugin](#)
- And so on

## 7. UI Test Automation using appium

- Write tests against multiple platform
- Run tests on multiple Tizen devices

## 7. UI Test Automation using appium

- We are contributing to appium for supporting Tizen
  - Appium tizen drivers  
<https://github.com/Samsung/appium-tizen-driver>
  - Appium client library (for C#)  
<https://github.com/appium/appium-dotnet-driver>
  - Tizen.Appium (for Tizen .NET apps using Xamarin.Forms)  
<https://github.com/Samsung/Tizen.Appium>

## 7. UI Test Automation using appium

- Preparing your Tizen .NET app for test

```
TizenAppium.StartService(app);
```

- Running your test app with appium

```
DesiredCapabilities appCapabilities = new DesiredCapabilities();  
appCapabilities.SetCapability("platformName", "Tizen");  
appCapabilities.SetCapability("deviceName", "emulator-26101");  
appCapabilities.SetCapability("appPackage", "ControlGallery.Tizen");
```

```
URL url = new URL("http://127.0.0.1:4723/wd/hub");  
TizenDriver<TizenElement> driver = new TizenDriver<TizenElement>(url, desiredCapabilities);
```

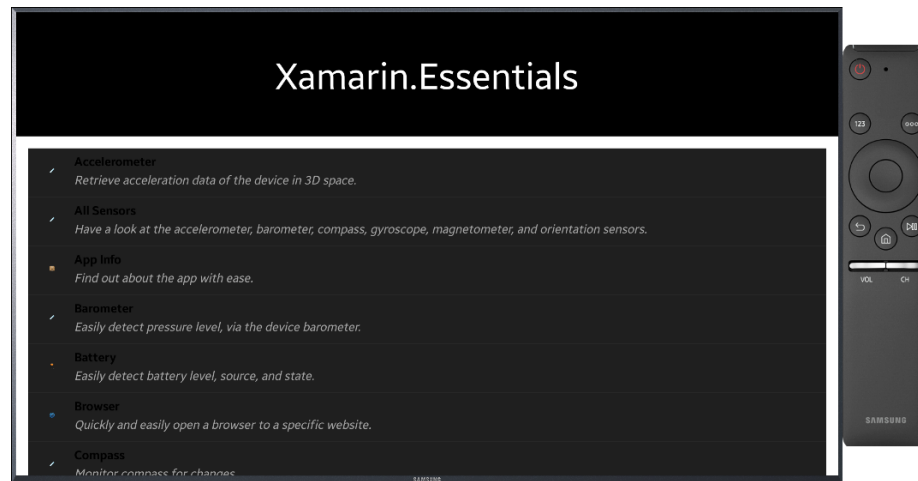

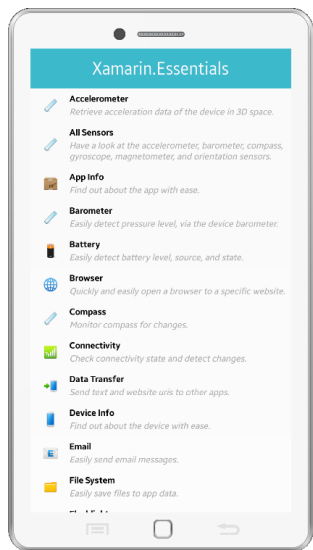

## 8. Xamarin Essentials for Tizen

- A single cross-platform device API
  - works with any Android, iOS, and UWP application.
  - can be accessed from shared code no matter how the user interface is created.
- Developing 30+ modules
  - accelerometer, battery, compass, ...
  - <https://github.com/xamarin/Essentials>

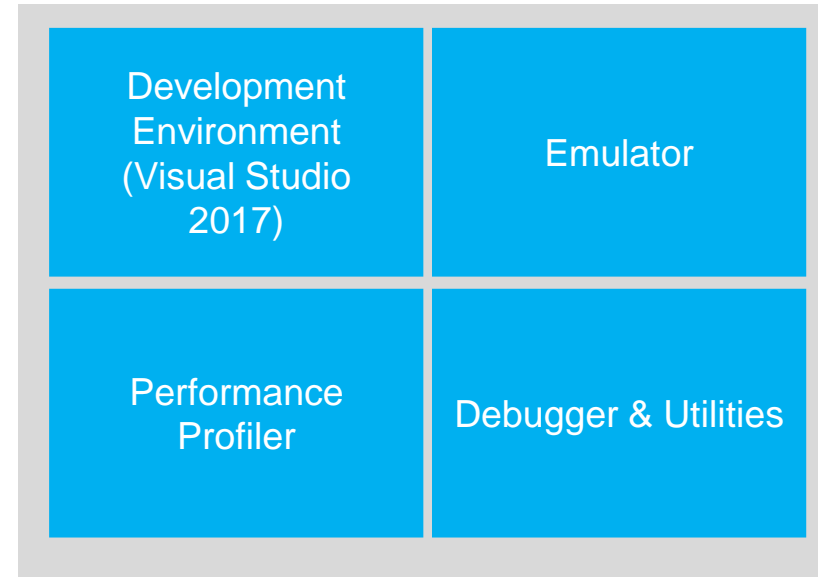

## 8. Xamarin Essentials for Tizen

- Tizen backend added !
  - Support multi-profiles (Mobile, TV, Watch)
  - Currently support 26 of 30 modules.

## 9. Tools update

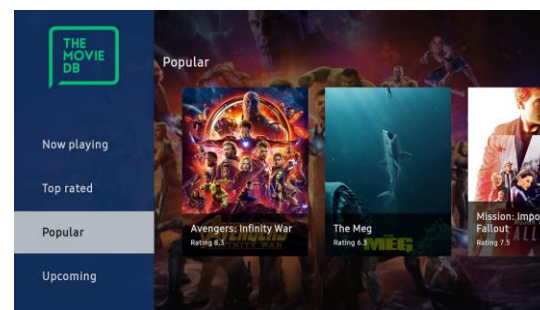

- Visual Studio Tools for Tizen
  - Project Templates
  - Manifest Editor
  - Emulators and Emulator Manager
  - Tizen Log Viewer
  - Tizen API and Privilege Checker

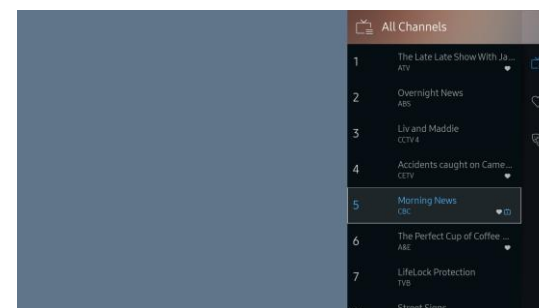

**Visual  
Studio Tools  
for Tizen**

- For TV

A screenshot of the Roku TV home screen. The background is a colorful, abstract, wavy pattern. At the top, the text 'Live TV' is displayed. Below it is a dock containing several app icons: a green icon with two white dots, a black icon with 'HOME FITNESS' in yellow, a black icon with three vertical red bars, a white play button on a black background, a purple icon with a white wave, a blue icon with a white 'X', a blue icon with a white 'B', an orange icon with a white baseball, a red icon with a white 'B', and a blue icon with a white 'B'. At the bottom, there is a row of larger, rounded rectangular buttons: 'Live TV' (blue), 'NETFLIX' (red), 'amazon' (black with white text), 'Internet' (blue with white text), 'SmartThings' (white with blue text), 'YouTube' (red with white text), and 'All' (blue with white text).

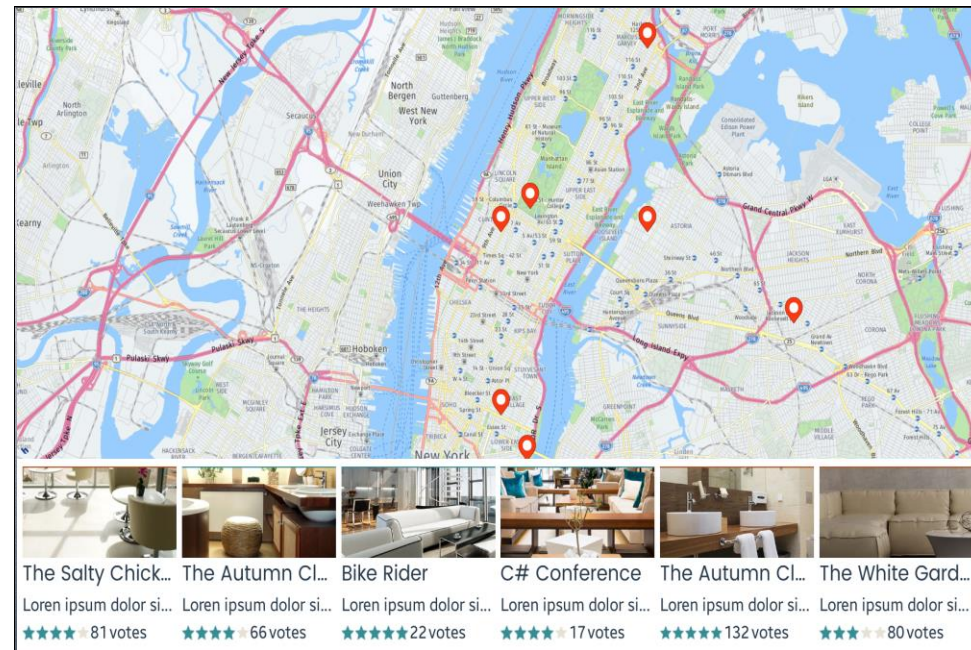

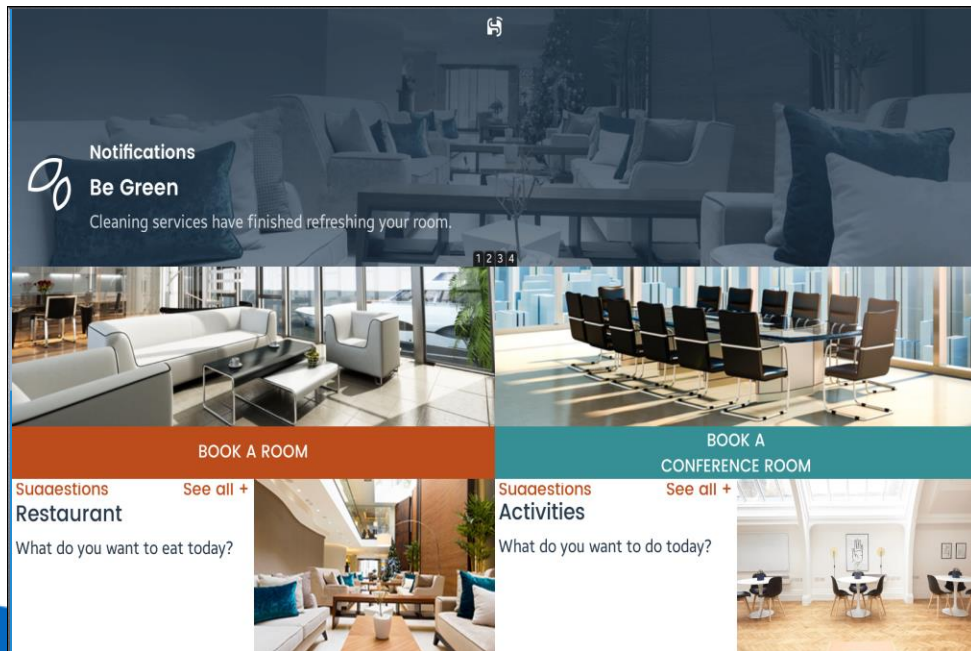

# Demo 1

A Tizen .NET TV app

# SmartHotel 360 - E2E reference sample and Azure backend

- [SmartHotel360](#) is a fictional smart hospitality company showcasing the future of connected travel
- [SmartHotel360](#) was shared as reference samples at Connect(); 2017 [Scott Guthrie's keynote](#)

Demo 2

# Tizen .NET Wearable Apps

# Conclusion

## Summary

- Tizen platform is being used on more than **100 million** devices
- Tizen .NET brings you
  - High productivity ( .NET Core, CoreFX, Visual Studio, ... )
  - Consistent development environment for all Tizen devices
  - Cross-platform capability (Xamarin Forms)
- You can register Tizen .NET apps to Watch and TV stores
  - Watch apps for Galaxy Apps
  - TV apps for Samsung Apps
- More APIs & doc & samples for app developers
  - TizenFX, Tizen Circular API, Tizen TV UI for Samsung Smart TV, Xamarin 3<sup>rd</sup> party APIs, Xamarin Essentials, and more samples
